

Technical Data

Product : WA320

Product Name : GlueePad (Blue Sticky Pads)

Product Information :-

GlueePad (Blue Sticky Pads) are used as an integral part of Integrated Pest Management for monitoring and controlling pest population.

Insect Pests Monitored or Controlled By GlueePad :-

Whiteflies, Aphids, Thrips, Jassids, Leaf hoppers, Moths, Leaf miners, etc.

When to Use :-

Before cultivation of fields or gardens/orchards/greenhouses or before insect pests infestation.

Features :-

1. Pad size : 15 cm x 20 cm
2. Easy to install, ecofriendly.
3. Time and labor saving.
4. The glue does not dry out and the pads will last until the surface area is completely covered with insects, even through rain.
5. Highly attractive towards pests, less effective against pollinating insects.
6. Attracts pests from long distance.
7. Can be used in green houses, agricultural farms, gardens, nurseries and anywhere where insects are a problem.

Directions for Use :-

1. Take a wooden stick to hang the GlueePad in between the standing crops in such a way that it will stand one foot above the crop in the field.
2. Remove protective plastic cover present over GlueePad and arrange it in the east west direction of the wind.
3. Precaution should be taken while hanging the GlueePad is that leaves should not stick on the surface of the pad otherwise it will reduce the effectiveness of the pads.
4. Discard the pads once it gets completely covered by pests or dust.

Requirement of GlueePads Per Acre :-

25 numbers of GlueePads recommended per acre [Number of GlueePads per area depends on the number of insect pests per area].
