

Product : WA325**Product Name : SuperAce****Product Information :**

SuperAce helps in proper growth and development of crops, primarily used as a potential nitrogen fixing biofertilizer. Mostly suitable and recommended for sugarcane cultivation.

Fertilizer Type :

Acetobacter

Recommended Dosage :

2ml of per 100 litres of water

Directions for Use :***Soil application :***

1. Add 2ml of SuperAce in 100ml of water, mix well to get a homogenous solution.
2. Make up the final volume to 1 litre by adding water.
3. Mix well and use this SuperAce solution with 50kg of vermicompost/dung/compost manure. Apply this mixture around the root zone for crop per acre.

Seed/Seedling application :

1. Add 2ml of SuperAce in required volume of water to coat desired seeds per acre.
2. Boil 100gm jaggery or 10gm guar gum in required amount of water and allow it to cool.
3. To increase the sticking ability, add the cooled jaggery or guar gum mixture to the above microbial solution. Mix well till the solution gets homogenized.
4. Treat the seeds by gently rubbing them in the above solution for even coating. [Use rubber gloves].
5. Let the seeds dry for 15-20 mins in shade by spreading them on a plastic sheet.
6. Seeds treated in this manner can now be used for sowing purpose.
7. For seedling treatment, Dip the desired seedlings roots/shoots in the above solution for 5-10 secs and then use them for transplanting in the field.

Drenching/Drip application :

1. Add 2ml of SuperAce in 10 litres of water, mix well to get a homogenous solution.
2. Make up the final volume to 100 litre by adding water.
3. Mix well and use this SuperAce solution around the root zone for crop per acre through drenching or drip.

Foliar application :

1. Add 2ml of SuperAce in 10 litres of water, mix well to get a homogenous solution.
2. Make up the final volume to 100 litre by adding water.
3. It is recommended to carry out spraying in early morning prior to sunrise or early evening prior to sunset.

Incompatibility :

Do not use the product along with chemical fertilizers.

Compatibility :

Compatible with other biofertilizers/biopesticides.

Quality Control :

Base	Liquid
pH	3.5 - 6.0
Viable cell count	10 ¹¹ colony forming unit /ml of liquid
Efficiency character	Yellowish pellicle formation in semisolid N free medium

Storage & Shelf life :

Store the product below 30⁰C in a cool dry place away from direct heat and sunlight. Do not store the product along with food or animal feed. Empty vial should not be used for storage of any food products. Keep the product out of children's reach. Use before the expiry date mentioned on the label.

Note :

For Agricultural use only.
