

Technical Data

Product : WA328

Product Name : SuperZinkSol

Product Information :-

SuperZinkSol helps in proper growth and development of various crops, primarily because of its ability to solubilize insoluble form of zinc into accessible form for plant assimilation

Application : Zinc solubilizer

Fertilizer Type : Zinc solubilizing biofertilizer

Recommended Dosage : 2ml of SuperZinkSol per 100litres of water is recommended for one acre land.

Directions for Use :

Soil application :

1. Measure out approximately 10 litres of water. Add 2ml of SuperZinkSol and mix well to get a homogenized solution.
2. Add some more water and finally make up the volume to 100 litres.
3. Mix well and use SuperZinkSol solution in the ratio 100ml per plant through drip or by spraying it around the root zone of the crop.

Seed application :

1. Measure out approximately 20 litres of water. Add 2ml of SuperZinkSol and mix well to get a homogenized solution.
2. Mix 10 kg of desired crop seeds to this solution evenly with the aid of a wooden stick or with hands wearing rubber gloves.
3. Soak the seeds in SuperZinkSol solution for 5 minutes.
4. After 5 minutes remove the seeds from the SuperZinkSol solution, dry the seeds for a short while in shade by spreading them on a plastic sheet or gunny bag.

Quality Control :

Colour of liquid	Light brown to brown
Total viable count	10 ¹¹ colony forming unit /ml
