

Technical Data

Product : WA342

Product Name : SuperF-Fly 086 [Fruit Fly Lure]

Product information :

Highly effective, eco-friendly, spices specific IPM tool with MAT technology for fruit cultivation to prevent fruit fly damage.

Requirement :

6 lures/ acre

Direction for use :

- 1) Fix the trap container on the tree properly at a height of 3 to 5 feet above the ground level under the shade.
- 2) Fill the container with water at 1/3 level of trap, to avoid flies going away from the trap.
- 3) Fix the WA342 lure on the hook provided inside the trap container.
- 4) Make sure fixed lure does not oscillate and fall down by wind currents.
- 5) Remove flies within a week from the trap.
- 6) Bury the lure underground after use.

When to use :

For better results, use the lure starting from the pre harvesting period for protecting yield.

Recommended crops :

Mango, guava, citrus, papaya, melon, apple, capsicum, tomato, peach, cucumber, orange, sweet lime, pomegranate, fig, jackfruit, kiwi, pear etc

Field viability :

50-60 days under field conditions upon opening

Shelf Life (under packed condition) :

12 months from the date of packing

Storage :

Store the product in a cool dry place away from direct heat and sunlight.
