

Product Code : WA359-1KTx2ML

Product Name : Super KA2P [Seed Treatment Kit]

Product Information :

WA303-1NO x 2ML	SuperPotSol	It helps in increasing availability of inorganic potassium to the growing crops by mobilizing insoluble potassium from soluble potassium compounds present in soil.
WA309-1NO x 2ML	SuperNitro	It helps in increasing availability of inorganic nitrogen to the growing crops by assimilating atmospheric nitrogen.
WA325-1NO x 2ML	SuperAce	It helps in increasing availability of inorganic nitrogen to the growing crops by assimilating atmospheric nitrogen.
WA302-1NO x 2ML	SuperPhosSol	It helps in increasing availability of inorganic phosphorus to the growing crops by dissolving insoluble phosphorus compounds present in soil.

Recommended Dosage :

For the treatment of seeds required per acre of plot mix, SuperPotSol (2ml), SuperNitro (2ml), SuperAce (2ml) and SuperPhosSol (2ml) in 10-50 liters of water.

Directions for Use :

1. Measure out approximately 10-50 liters of water. Add contents of the vials in Kit e.g., SuperPotSol (WA303), SuperNitro (WA309), SuperAce (WA325) and SuperPhosSol (WA302) and mix well to get a homogenized solution.
2. Boil 100 gm of Jaggery and 10 gm of Guar gum in required amount of water and allow it to cool.
3. To increase the sticking ability and efficacy of the microbial consortium, add the cooled Jaggery & Guar gum mixture to the above microbial consortium. Mix thoroughly with gentle stirring till solution gets homogenized.
4. Soak the required amount of seeds per acre in the above solution for 5 to 10 mins. Then decant the solution and dry the seeds in shady place.
5. Seeds treated in this manner are now ready for sowing.

Suitability :

This kit has been tested and is found suitable for agricultural use.

Storage & Shelf life :

Store the product in a cool dry place away from direct heat and sunlight. Use before expiry date mentioned on the label.
