

Product Code: WA404

Product Name: Super BDM (Basal Dose Microbial Kit)

Product Information:

Super BDM kit (Basal Dose Microbial) is designed to be used along with the basal dose at sowing/ planting/transplanting time to enhance crop vigour along with protection from disease infestations at initial stage.

Recommended Dosage:

Mix the entire kit content in 100 liters of water and use for one-acre land.

Directions for Use:

Soil application:

Measure about 1 liter of fresh and clean water. Add all the contents of SuperBDM Kit (WA404) and mix well to get homogenized solution. Sprinkle the above prepared solution gently on 20kg well decomposed FYM/compost /Vermicompost and mix well, allow the mixture to dry for an hour in shade. Now the above prepared mixture is ready to broadcast in the field. In case of standing crops apply this mixture around the crops root zone.

Drip / Drenching:

Add all the kit contents in 10 litre of fresh & clean water and mix well to get a homogenized solution. Make up the volume to 100 litre by adding water till homogenized solution is obtained. The mixture is now ready to use.

Storage & Shelf life:

Store the product in a cool place away from direct heat and sunlight. Do not store the product along with food or animal feed. Empty containers should not be used for storage of any food products. Keep the product out of children's reach. Use before the expiry date mentioned on the label.

Note:

For Agricultural use only.

Warranty:

The use of this product is beyond our control, we only assure the uniform quality of the product. The company is not responsible for crop damage occurring due to usage other than recommended dosage, sudden changes in environmental conditions or any natural calamity.
