

Product Code: WA413

Product Name: SuperNPKsol Kit

Product Information:

SuperNPKsol Kit (WA413) can be used to treat all types of vegetables, cereals, oilseeds and cash crop seeds.

Kit Contents:

WA302 – SuperPhosSol™

WA303 – SuperPotSol®

WA309 – SuperNitro™

Recommended Dosage:

For the treatment of seeds required per acre of plot mix, the kit content in 10-50 liters of water.

Directions for Use:

Seed treatment:

Measure out approximately 10-25 litre of water. Add all the kit contents of SuperNPKsol Kit (WA413) and mix well to get a homogenized solution. Boil 100gm of Jaggery and 50gm of Guar gum in required amount of water and allow it to cool. To increase the sticking ability and efficacy of the microbial consortium, add the cooled Jaggery & Guar gum mixture to the above microbial consortium. Mix thoroughly with gentle stirring till solution gets homogenized. Soak the required amount of seeds (upto 100kg) in the above solution for 5 to 10 mins. Dry the seeds in shade for 15-20min. Seeds treated in this manner are now ready for sowing.

Drip / Drenching:

Add all the kit in 10 litre of fresh & clean water and mix well to get a homogenized solution. Add 90 litre of water to the above solution and make up the volume to 100 litre till homogenized solution is obtained. The mixture is now ready to use.

Storage & Shelf life:

Store the product in a cool place away from direct heat and sunlight. Do not store the product along with food or animal feed. Empty containers should not be used for storage of any food products. Keep the product out of children's reach. Use before the expiry date mentioned on the label.

Note:

For Agricultural use only.

Warranty:

The use of this product is beyond our control, we only assure the uniform quality of the product. The company is not responsible for crop damage occurring due to usage other than recommended dosage, sudden changes in environmental conditions or any natural calamity.
